REVENANT CUSTOM GLOCK G20 10MM

If you spend enough time in the backcountry you are aware that it is not a matter of if but when you have a run in with a bear or other predatory animal. We designed the Revenant for that moment when your life depends on your defensive side arm. The aggressive slide cuts allow for gross motor skill manipulation and weight reduction, the DLC and PVD treatment ensure this pistol is element proof, with the very distinguished engagement wall that the RP trigger provides, you'll know exactly when your shot will break. The night fission suppressor height sites give you a larger profile to acquire in high stress situations, as well as provide you with extremely bright illumination in low light environments. This pistol will save your life. DON'T BE BEAR SHIT!
